Assignment 2 - Photoshop to HTML conversion

I am sharing a design template of a HTML webpage with you. Your task is to convert that template into a static HTML webpage.

Marks will depend on the completion of following milestones

- Yours webpage must be **responsive** (Flex-box or Bootstrap Grid to accomplish this task)
- You can use images of your choice
- To know the rgba / Hex code of colors used in the template you can use/install Color picker extension on your browser extension tool Google Chrome
- Submit your project folder here on LMS or If folder size is larger then upload your folder to your Google drive and make it public and share the drive link as a solution to the assignment
- Create a **Github repository** of your project as well. Push your Code there and share the repo link also here with solution
- Host your webpage on **surge server** as well and name the domain on your own name and roll number
- Your submitted folder must include your HTML file, CSS file, Images folder as well
- Late Submitted not accepted. Zero percent relaxation for late submission.

HTML Template Photoshop Image can be downloaded from the below link
